FREIGHT SERVICES

1

Whether managing a load of freight, carriers, or fleet of vehicles, our portfolio of transportation logistics is flexible, efficient, and dynamically in tune with your operation so you can get your consignment to your final destination.

Our Freight Management services give you access to freight brokerage, dedicated truckload, our nationwide network of more than 5 partners carriers, and the most advanced technology available to give you a complete, real-time notification and view of your freight during transit.

Our Transportation Management services offer the insight, management expertise, purchasing power, and standard operating practices it takes to improve visibility, make better use of assets, reduce costs, and improve customer service. And, our Dedicated Transportation Solutions, give you a right-sized fleet with specialized equipment, drivers recruited and trained for your business, fleet maintenance, and innovative technology that

CUSTOM CLEARANCE

Multi-Asset Custody, Clearing & Technology Solutions Are you searching for reliable freight forwarding company in Tanzania? You must find a forwarding partner that thrives on maintaining the highest standards in terms of safety and quality, starting from loading to unloading your shipment.

Through its various techniques, Brax Logistics is a leading provider of execution, risk management, market intelligence, and pre- and post-trade services across asset classes and markets across the region. We are a Calgary based Tanzanian customs broker and freight forwarder offering services to non-resident and resident importers.

While we specialize in the Tanzanian market we are able to move goods anywhere in the world. If necessary we can have the duty paid with the bill coming back to you so that you are able to sell as if you are in your customers' country. All of our customers are assigned an individual customer service representative who is trained, and familiar with, your

CONTRACT LOGISTICS

We simplify your logistics, while plugging your company into a world of opportunities. We believe every company deserves to feel the excitement of going global, regardless of size. With Brax you get clear visibility of your shipment's journey. You can book your shipping container from warehouse to warehouse, port to port or other combinations. Whatever you choose, we make sure you can track your cargo along the way and stay up to date on its status.

Brax Logistics Company also offers a 3PL freight brokerage services that are active problem-solving services that are offered by professionals who excel in fast-paced, customer-centric environments because they must act fast to link shippers with appropriate carriers

WAREHOUSING

Eliminate Waste, Shorten Inventory Lead Times, and Improve Overall Quality and Fulfillment with our LEAN Approach to Warehousing.

The need for flexible and scalable warehouse solutions is growing as supply chain operators try to meet rising industry challenges and consumer demands. Coupled with the talent shortage, these challenges are whether it's finding the perfect location and building a distribution center from the ground up or managing an existing facility, our solutions include designing a layout and implementing processes, equipment, and visibility tools to help you improve efficiency and customer service levels.

We also hire and train personnel, which can include your current warehouse employees who know your business best, to ensure that your goods flow smoothly and inventory arrives when and where it's needed, in the exact quantity needed.

"Reduce on-hand inventory with predictive and actionable analytics"
